

Open Frame with Double Bar on Top

The 80% recycled content, 3/8" thick steel frame literally sets up in seconds.

Make sure that the "double bar" is on top when setting up the frame.

How to Lock the Bag to the Frame

Pull Through

Work from inside to outside. Using two hands, pull top edge of bag through the double bar toward you approx. 6".

Push Over

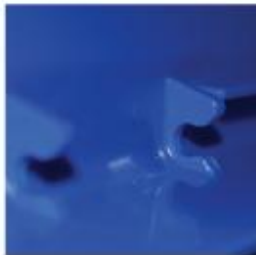

Still using two hands, push the top edge of the bag over the double bar approx. 6", catching the corners.

Tighten

Now, grasp both sides of the bag. Pull down and in to tighten around the corners. Repeat on other side.

Snap the Lid to Frame

With the two decals applied in advance, the lid has four hidden clips which snap securely to the frame.

You're done!

ENVIRONMENTAL SERVICES

Helpful Hints:

- 1. Place units next to trash containers for best results**
- 2. High winds will knock over units. Please be aware.**
- 3. Bags that are filled with more than half trash (non-recyclables) need to be thrown in trash.**
- 4. Take full bags to the designated recycling location.**
- 5. For more information please call 225-4999 or visit www.mcswd.org**
