## E-RECORDING

E-recording is the process of submitting documents for recording online and having them reviewed, recorded, and returned back to the submitter electronically.

Miami Valley Land Title Association

On January 8th, Recorder McClain had the opportunity to speak to the Miami Valley Land Title Association about how e-recording will allow individuals, title companies, lending facilities and attorneys to conveniently record non-transferable documents electronically without the original documents ever leaving their homes or offices.

The Montgomery County Recorder's Office is on target to begin e-recording documents in early spring.
