“Versatility” and “adaptability” were perhaps the biggest keywords Environmental Services operated by as we continued to navigate the pandemic in 2021.

We are so proud of all the Environmental Services department’s accomplishments despite several waves of COVID-19 variations, inflation, supply chain issues and more. We are truly a department that knows how to adapt to continue serving our core missions.

One of our largest projects we spearheaded in 2021 was to sample our water distribution system for Per- and Polyfluoroalkyl Substances (PFAS). While it is not required of distribution systems to sample for these substances, we went above and beyond to know exactly what is in our water. Our results came back favorable, with only trace amounts of the substances present. We will continue monitoring these levels to ensure quality drinking water for our customers.

Some of our most public-facing projects included the tank rehab projects in Centerville, as well as projects to combat erosion – such as an area at Grant Park. Our staff also participated in cleanup events, parades and most notably, a tree re-planting at Sinclair Park in Harrison Township, which was devastated by the 2019 Memorial Day tornadoes.

Our Solid Waste District also made significant updates in 2021. For the first time in 24 years, the district changed its rates to provide equity to our Montgomery County residents. It also took measures to understand how to make the facility a safer environment for workers and visitors. The results of that study will be implemented in 2022.

We are excited about the opportunities 2022 brings. We have several projects that will soon improve our departmental processes. We are proud of the team and all that they have accomplished for our residents!

Sincerely,

Michael Colbert
County Administrator

Matt Hilliard
Director of Environmental Services

*The abandoned call percentage is calculated by comparing the number of calls received to the number of calls answered. An abandoned call can occur for many reasons, for example, a customer in the call queue can hang up or the call can be missed by a customer service representative.

2021 Water Reclamation Facilities Flows

- **Eastern Regional Water Reclamation Facility**: Average Daily Flow 8.62 MGD*, Total Flow Treated in 2021 3,217,032,000 Gallons
- **Western Regional Water Reclamation Facility**: Average Daily Flow 12.14 MGD*, Total Flow Treated in 2021 4,330,123,000 Gallons

2021 Reports of Water in Basement (WIB)/Sanitary Sewer Overflow (SSO)

Customers contact Montgomery County when there is a sewer backup problem. A field services team member visits the site of every event. This investigation determines if the event was caused by a failure in the Montgomery County sanitary sewer system. If the event is determined to be a result of a Montgomery County sanitary sewer failure, a work order is created to resolve the situation. All confirmed SSO and WIBs are shown as “reported” below.

In 2021, the Montgomery County Solid Waste District provided $517,602.40 in grant funding to local communities, businesses, schools and nonprofit organizations. Funding is used to enhance, increase and promote recycling, waste reduction, and the end-use market of recycled materials in Montgomery County.

In the 2021 grant cycle, Solid Waste revised the District Incentive Grant program working to align the District’s waste reduction and recycling goals with the grants it awards.

The University of Dayton received a Business Incentive Grant to purchase an in-vessel composting unit to process food waste scraps from cafeterias, sports venues and other on-campus activities where food scraps cannot be sent to local food rescue outlets.

This grant allows the University of Dayton to continue its mission of creating a sustainable future for students and Montgomery County. Eleven municipalities and one organization received a District Incentive Grant in 2021.

The City of Riverside utilized funds to replace and refurbish old playground equipment using recycled plastic materials.

The City of Oakwood was awarded a District incentive grant that was used to redesign the communities recycling drop-off area and provide additional space for expanding the materials they can recycle.

The following are the breakdowns of the various grants awarded and the participating communities, businesses, organizations and non-profit organization:
2021 Beautification Grants

Beautification Grants provided $17,535 for 30 projects in 2021 to promote volunteerism and community beautification.

American Veterans Heritage Center/Dayton VA
Brookville Community Theater
Canaan Missionary Baptist Church
Christ the King Anglican Church
City of Germantown
City of Huber Heights
Cleveland Elementary School (YMCA)
Dayton View Triangle Federation
Downtown Dayton Partnership
East End Community Services
Friends of the Castle
Gloria Dei Montessori
Historic Huffman Neighborhood Association
Historic South Park
Huffman Community Garden
Linden Heights Community Council
Living Word of Faith CDC
Love Northridge
Marine Foundation
New Lebanon Parks and Recreation
Northside Park Community Garden
Ronald McDonald House
Sons of Civil War Veterans
St Anne’s Hill Historic Society
The Westwood Right Project
Trotwood Little League
Walnut Hills Neighborhood Association
Washington Township VIP
Wright-Dunbar Village Neighborhood Association

Yard Waste Drop-Off

Montgomery County operates a free drop-off for residents to properly recycle yard waste. Clean, separated, organic materials are accepted.

In 2018, the SWD was awarded a Community Development Grant from the Ohio EPA to assist with the purchase of a horizontal grinder. The grinder was purchased in early 2019 and has been in operation since May 2019. The machinery is used to complete a first grind of yard waste and untreated wood that is diverted from the SWD’s tipping floor/normal solid waste stream.

Five-Year Plan for 2019-2023

Ohio enacted House Bill 592 in 1988, which directed solid waste districts to reduce reliance on landfills and increase efforts to reduce, reuse and recycle. The bill also mandated that solid waste districts create a Five-Year Plan to outline operations and educational efforts to reduce waste sent to landfills. The Montgomery County Solid Waste District completed its Five-Year Plan for 2019-2023. The plan completed the ratification process and received 100% approval from all of our local jurisdictions and was approved in April 2019 by the Director of the Ohio Environmental Protection Agency. The District began implementing the Five-Year Plan pursuant to the Director’s approval.

The Five-Year Plan can be found online at www.mcohio.org/MCSWDFiveYearPlan.pdf.

For more information, please contact John Minear at 937-225-4999.

* Data from the 2021 Annual District Report, prepared for the Ohio EPA in accordance with OAC 3745-27-90.

**All numbers are calculated in tons.

---

Education and Outreach

- 8,635 citizens reached through our educational programs
- 25 tours of the Environmental Learning Center
- 123 outreach events
- 23 educational presentations

Recycling at Transfer Station

- 919 tons of scrap tires
- 9,664 tons of yard waste
- 336 tons of household hazardous waste
- 296 tons of electronics
- 91 tons of paper

Keep Montgomery County Beautiful

- 338 community beautification clean ups
- 4,022 volunteers cleaned up
- 129 tons of litter collected
- 32 cleanup trailer events

Environmental Crime Prevention

- 79 investigations
- 28 prosecutions
- 27 convictions*
- 143 inspections & outreach events

* Pandemic has slowed court proceedings, additional convictions are expected from 2021 cases.

“Reduce, Reuse, Recycle! Check out how we’re doing in Montgomery County.”
