

## Extra instructions for users installing the Cisco AnyConnect Security Mobility Client (VPN client) on MacOS 11 Big Sur.

After downloading the VPN client from the bottom of the page of this link:

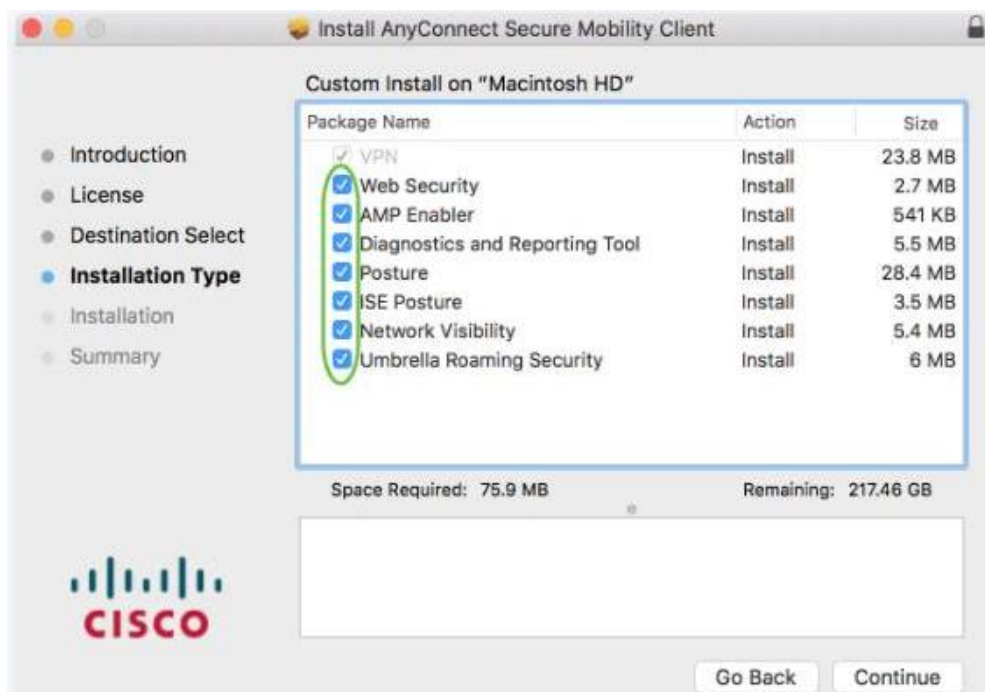

[https://www.mcoho.org/government/elected\\_officials/auditor/data\\_processing.php](https://www.mcoho.org/government/elected_officials/auditor/data_processing.php)

Next, you will start the install:

Double-click the installer.

Here is the most important section you need to do. In the next image, uncheck every component listed **EXCEPT** VPN and Diagnostics and Reporting Tool. Then click 'Continue'.

Default selections from this point until installation is complete.

That shall complete the installation of the Cisco AnyConnect Security Mobility Client on your MacOS system.
